

Bovacillus®

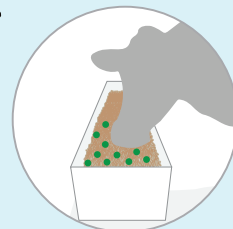

FEED STABLE PROBIOTIC

STABLE IN THE FEED

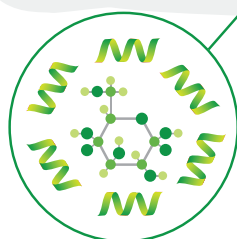

GERMINATE RUMEN ACTIVITY

Bovacillus® is a new all-natural probiotic supplement developed to improve the digestive health of cattle. The active probiotic comprises two robust *Bacillus* cultures that remain stable in pelleted feeds, liquid supplements, mineral licks and blocks.

ACTIVE IN THE ANIMAL

1. Dormant *Bacillus* spores ingested via licks, block or feed source
2. Spores germinate inside the animal's GIT
3. Billions of *Bacillus* bacteria multiply and secrete digestive enzymes and can assist in pathogen inhibition via competitive exclusion and mucin production
- 4 & 5. The active bacteria produce new spores which are excreted in the animals faeces
6. *Bacillus* spores return to the earth as the faeces break down

ENERGY TO GROW

Bovacillus does its best work in the gastro intestinal tract. Ingested by the animal as spores in the feed source, the billions of **Bovacillus** bacteria grow and multiply once in the animal's gut, secreting enzymes that help break down fibre and improve digestibility.

Bovacillus®

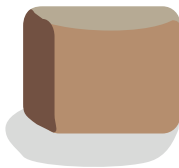

FEED STABLE PROBIOTIC

HEAT STABLE

Bovacillus® is an all-natural probiotic supplement that comprises two robust *Bacillus* cultures. International trials have shown the bacteria survive heat treatment and remain viable, making it the ideal supplement for a variety of feed applications. To learn more contact Nutriment Health now and request a copy of our White Paper.

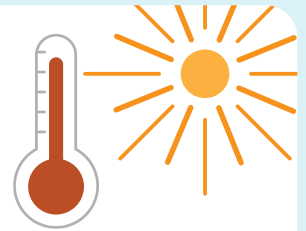

**Survives in
mineral block**

**Survives
in pellets**

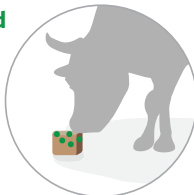

**Proven heat
stability**

Bovacillus spores are proven to survive the temperatures required to create mineral blocks and produce pellets.

**LONG
LASTING
2 YEARS**

**Proven
stability in
hardened
blocks**

**Proven
stability in
liquid feed
supplements**

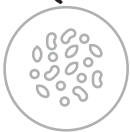

**Proven
stability in
milk
replacer**

Studies confirm **Bovacillus** spores remain alive in the feed sources.

READY FOR ACTION

**Bovacillus is a versatile
probiotic ideal for use in a
broad range of applications**

• Pellet feed • Milk replacers • Premixes • Complete feed • Pasteurised milk • Blocks • Cubes • Steamed flakes • Mineral mix
